Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species 1a, drawn to a fluid drop steering device being a mechanical actuator (for example, as presently disclosed in claim 2)

Species 1b, drawn to a fluid drop steering device being a heater (for example, as presently disclosed in claim 6)

Species 1c, drawn to a fluid drop steering device being a plurality of electrodes (for example, as presently disclosed in claim 16)

Species 2a, drawn to a fluid drop forming mechanism being a heater (for example, as presently disclosed in claim 17)

Species 2b, drawn to a fluid drop forming mechanism being a piezoelectric actuator (for example, as presently disclosed in claim 18)

Species 3a, drawn to the fluid drop forming mechanism is a drop on demand drop forming mechanism (for example, as presently disclosed in claim 20)

Species 3b, drawn to the fluid drop forming mechanism is a continuous drop forming mechanism (for example, as presently disclose in claim 21)

Species 4a, drawn to the fluid drop steering device located within the fluid chamber (for example, as presently disclosed in claim 25)

Species 4b, drawn to the fluid drop steering device located removed from the fluid chamber (for example, as presently disclosed in claim 26)

If species 1a is elected, the applicant must further elect a sub-species:

Sub-species 5a, drawn to a fluid drop steering device being a paddle (for example, as presently disclosed in claim 3)

Sub-species 5b, drawn to the mechanical actuator being a valve (for example, as presently disclosed in claim 5)

If species 1b is elected, the applicant must further elect a sub-species:

Sub-species 6a, drawn to a heater located outside the chamber (for example, as presently disclosed in claim 8)

Sub-species 6a, drawn to a heater located inside the chamber (for example, as presently disclosed in claims 8 and 13)

The species are independent or distinct because each species and sub-species is distinct and requires a burdensome search.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura E. Martin whose telephone number is (571) 272-2160. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
